**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 31 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

**DETAILED ACTION**

***Election/Restriction***

1. Restriction is required under 35 U.S.C. §§ 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 C.F.R. § 1.499, Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1 to 32, 34, and 58, drawn to a rotary concrete drum with an interior surface partially provided with a polymer impregnated with a slip agent;

Group II, claim 33, drawn to a fin comprising an exterior surface partially provided with a polymer impregnated with a slip agent;

Group III, claims 35 to 45, drawn to a method for forming a concrete mixing drum with an interior surface partially provided with a polymer impregnated with a slip agent;

Group IV, claims 46 to 49, drawn to a method of finishing an exterior surface of a concrete mixing drum;

Group V, claim 50, drawn to a concrete mixing truck; and

Group VI, claims 51 to 57, drawn to a concrete mixing drum.

3. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

4. The inventions listed as Groups I to III lack unity of invention *a priori* from the inventions listed in Group IV, Group V, and Group VI because there is no common feature that links Groups I to III with Groups IV to VI, nor is there any common feature that links Group IV, Group V, and Group VI together. Furthermore, the inventions listed as Groups I to III lack unity of invention from each other *a posteriori* because even though the inventions of these groups require the technical feature of a surface partially provided with a polymer impregnated with a slip agent, this technical feature is not a special technical feature as it does not make a contribution over the prior art in view of Rodgers (WO 01/26871), Morita *et al.* (U.S. Pat. No. 5,432,211), and Yamasoe (U.S. Pat. No. 5,399,192) – all references cited in the International Search Report (ISR) mailed 29 December 2004, in the Written Opinion of the International Searching Authority (WOISA) issued 04 September 2006, and in the International Preliminary Report on Patentability (IPRP) issued 05 September 2006.

**5. Applicant is advised that the reply to this Requirement to be complete must include (i) an election of an invention or species to be examined even though the Requirement may be traversed (37 C.F.R. § 1.143); and (ii) identification of the claims encompassing the elected invention.**

6. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the Restriction Requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the Requirement will result

in the loss of right to petition under 37 C.F.R. § 1.144. If claims are added after the election, Applicant must indicate which of these claims are readable on the elected invention or species.

7. Should Applicant traverse on the ground that the inventions have unity of invention (37 C.F.R. § 1.475(a)), Applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by Applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103(a) of the other invention.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).

9. A telephone call was made to Mr. John Lazarus on 03 May 2011 to request an oral election to the above Restriction Requirement, but did not result in an election being made. Mr. Lazarus requested that a written Restriction Requirement be issued.
